

Editor's note:

I've made a Bookmark index for this parts list, which should open automatically when you open up the document.

If you click on one of these Bookmarks you will be taken directly to the drawing which illustrates the section named in the Bookmark (if there is an illustration, or to the text page if there isn't). This poses a certain navigation problem, because you can't, on a normal-sized computer monitor, show the picture and text simultaneously, in the way the printed original does with facing pages. I suggest that having gone to the drawing, and from there into the text, that if you wish to return to the drawing you use the Bookmark to do so, then the 'Back' button to get you back to where you were in the text if you need to return.

In the interests of clarity and economy of space I've occasionally shortened the names Citroën gave to the sections, but generally I've tried to remain faithful to the slightly idiosyncratic original.

Likewise with the order. The logic of the division into sections is, let's say, an acquired taste! But with luck the Bookmarks will help you find what you are looking for! I've certainly found that they permit me to find things much more quickly.

In the interests of clarity I've taken the liberty of reducing the languages offered to three. This reduced the file size somewhat, but more importantly it makes the text easier to read, because with less of it it can be larger on the screen. I really hope I haven't offended the Italian and Spanish speaking people whose beautiful languages I've removed.
