

Vehicle Tilter

Any car can be tilted safely and effortlessly in the most confined spaces, with the aid of a power drill.

The LIQUI Vehicle Tilter is patented worldwide.

The LIQUI Vehicle Tilter eases welding work on the entire base of the chassis, replacing door thresholds, exhaust work, underfloor sealing, etc.

Engine and gearbox oil, fuel, coolant, windscreen washer water and brake fluid stay in the car.

Only the battery must be removed.

Easy to tilt with a power drill: the LIQUI Vehicle Tilter

It is a real technical sensation, because it allows you to work on the chassis easily and safely, under perfect light conditions.

Liqui Vehicle Tilter is screwed on
Start Position

Tilt Position

- Ⓢ Any car, cross country vehicle or minibus weighing up to 3.500 kg can be tilted to 90°.
- Ⓢ Easy to use, simple assembly (about 15 Min.), the set-up work corresponds to that of 3 wheel changes only.
- Ⓢ Only the battery need be removed. Engine and transmission oil, fuel, coolant, washer and brake fluid stay in the vehicle.
- Ⓢ Very safe and sturdy.
The car remains secure in any tilded position - a safety device prevents tipping back or over.
- Ⓢ Compact - can be used in confined spaces.
- Ⓢ The vehicle tilter weighs only 62 kg and fit easily in any trunk.
- Ⓢ Galvanized rockers.
- Ⓢ The vehicle tilter has passed all German safety standards and requires no services.
- Ⓢ 12 month guarantee.
- Ⓢ Patented worldwide.
